ANALYSIS OF STUDENT'S FEEDBACK (2021)

Student feedback is an essential part of the learning process. The Institute collects feedback from students on various aspects using a structured questionnaire. Feedback collected from students was analysed and steps were taken to enhance the quality of teaching and learning and look for opportunities to improve overall performance, including student engagement in the classroom to achieve excellence in teaching and learning. This questionnaire aims to collect information on the satisfaction of the facilities and services provided to create an atmosphere conducive to teaching and learning. The information provided by the students was kept confidential and used as important feedback to improve the quality of the various courses and programs offered by the institution. To obtain complete results, statistical analysis and graphical presentation were carried out. Responses are rated on a five-point scale. The students indicate their level of agreement with the following statements by selecting the appropriate option. Total consolidated responses received from odd and even semester students. IQAC analysed the responses from the student feedback form and submitted the report to the authorities, who in turn discussed various aspects, including meetings with faculty members.
