Mechanism of Attainment of COs and POs

Comprehensive Assessment and Mapping of Course Outcome (COs), Program Outcome (POs), and Program Specific Outcome (PSOs):

A Structured Approach for Academic Excellence.

Course Outcome (COs) serve as a comprehensive measure of student's knowledge and values at the end of each course. The assessment of Program Outcome (POs) and Program Specific Outcome (PSOs) is derived from the attainment of COs, ensuring a holistic evaluation of the curriculum. This detailed report elucidates the methods, tools, and criteria employed in assessing COs, POs, and PSOs.

Attainment of CO's and PO's

COs Attainment Methodology

The Methodology used for COs Attainment is Internal evaluation and External evaluation.

1. Internal evaluation: Evaluation of test, average of attendance, active learning internal/ lab, active learning external, obtained marks are converted in percentage, 50% of this added with 50% of external evaluation.
2. External evaluation: Evaluation of semester/ year end examination, obtained marks are converted in percentage; 50% of this is added with 50% of internal evaluation.

Total number of students above 60% is divided with total number students attended, termed as CO attainment

POs and PSOs Attainment Methodology

The Methodology used for POs Attainment is Direct evaluation and Indirect evaluation.

1. Direct evaluation: An average of all courses COs attainment under program converted in 50%.
2. Indirect evaluation: Students exit survey, placement and progression to higher education is assessed, converted to 50%.

50% of Direct evaluation is added with 50% of indirect evaluation and calculated POs, PSOs attainment.
